AMERICAN COIN SCALE.

This Catalogue comprises a small but elegant and very valuable collection of the Coins of Ancient Greece and Rome, struck in Gold and Silver. If it does not possess the abundance of material which distinguished the Schieffelin Collection, dispersed a decade since, or rival the Anthon Cabinet in the importance of its series, it yet surpasses both in the beauty and rarity of many of the specimens, especially of those of the Archaic or earliest period of Greek Art, in which this collection has not yet been surpassed here and rarely abroad. Coins of such historical, artistic, and numismatic merit are very rarely offered, and we bespeak from Curators of Public Museum, Archaeologists, Art Students, and others interested in the subject of Ancient Art, as well as Numismatists, the attention which this collection deserves, and a cordial support at the time of the sale.
